Project Name	Global Olympic Sports Performance Analysis

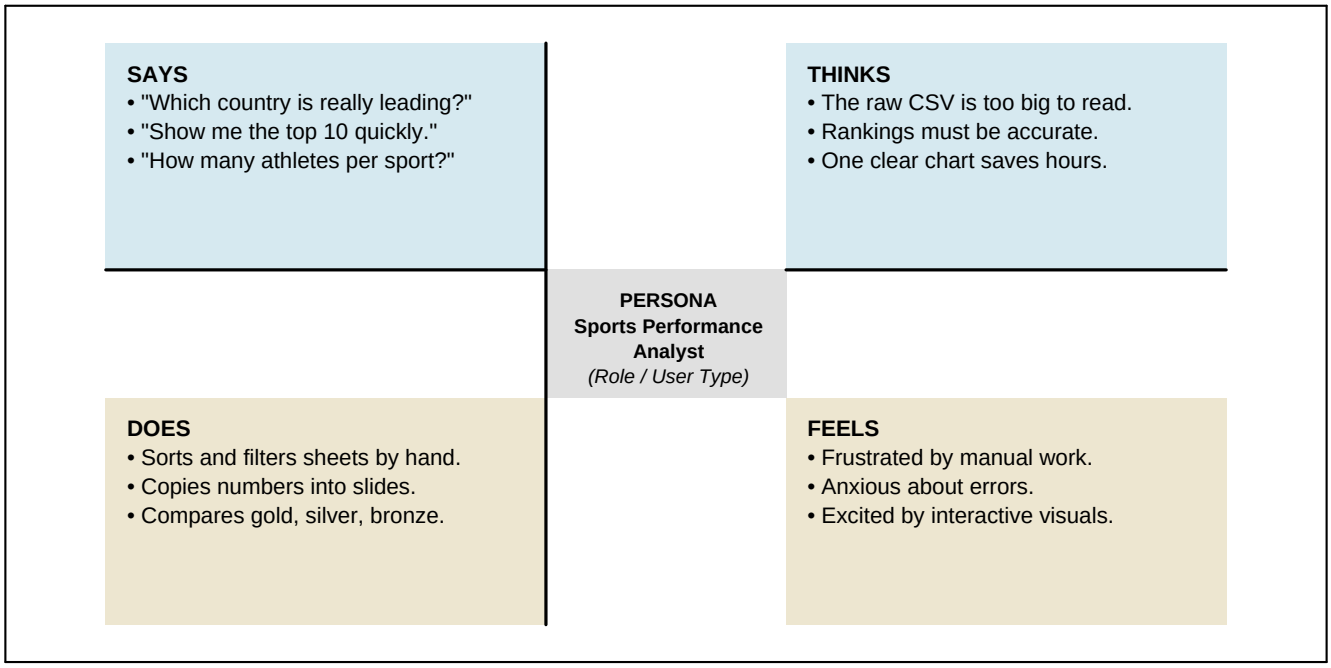

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

PAINS	GAINS
Time-consuming manual aggregation; hard to rank 60 countries and 50 sports; risk of double counting athletes; static tables without interactivity	Instant top-10 rankings; colour-coded gold / silver / bronze comparison; one dashboard and a guided story; faster evidence-based decisions
