Dashboard Design

Date	01-11-2026
Team ID	EN25CS3011097
Project Name	Global Olympic Sports Performance Analysis

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are the key principles and best practices applied in the Dashboard 1 design of the Global Olympic Sports Performance Analysis project.

Activity 1: Interactive and visually appealing dashboards

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Dashboard 1 was designed to take care of the points below.

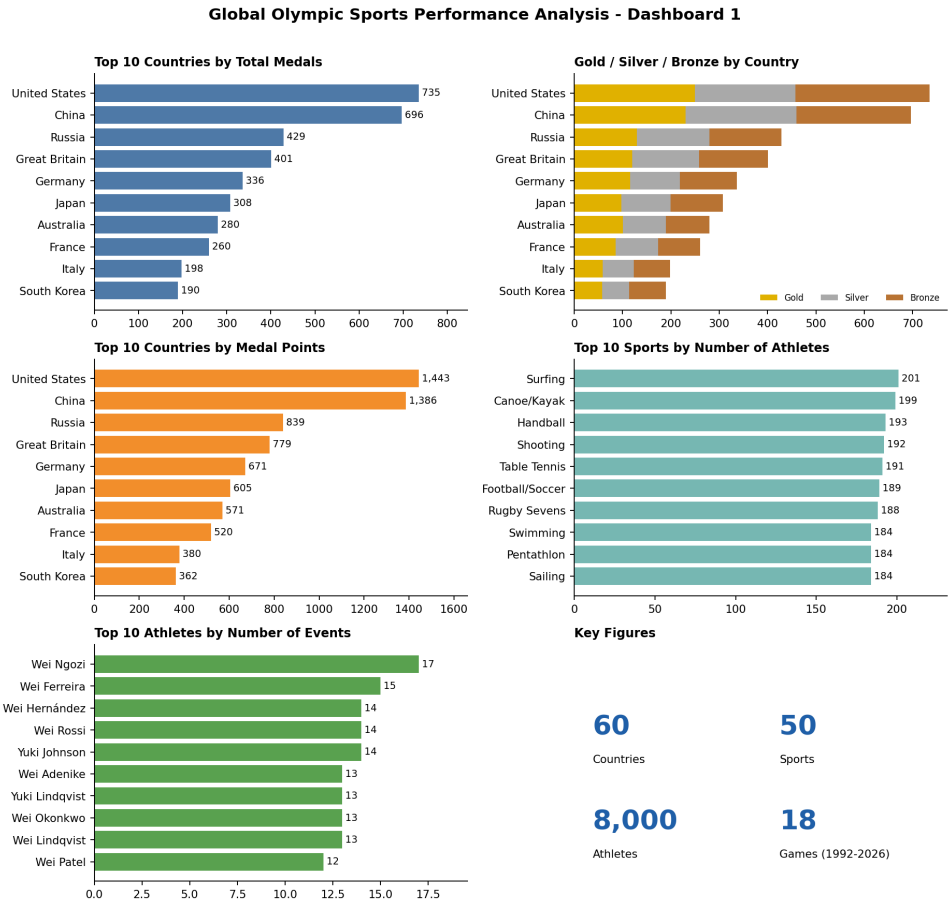

Figure: Dashboard 1 – Global Olympic Sports Performance Analysis

- **Clear and Intuitive Layout:** five ranked charts in a grid with a clear title for each, and a Key Figures block (60 Countries, 50 Sports, 8,000 Athletes, 18 Games).
- **Use Appropriate Visualizations:** horizontal bar charts for rankings and a stacked bar chart for the gold, silver and bronze split.
- **Colour and Theming:** blue for medals, orange for medal points, green for athletes, teal for sports, and gold / silver / bronze colours for medal types.
- **Interactive Filters and Slicers:** filters on Country, Dataset Type, Sport and Name update the linked views.
- **Drill-Down Capabilities:** every chart is a Top 10 ranking that can be extended to a drill-down by Games year (see Future Scope).
- **Responsive Design:** all charts share one dashboard canvas so the views stay aligned and readable together.

- **Custom Visuals and Icons:** clean bar charts with data labels and a legend for medal types.
- **Use of Infographics:** large Key Figures tiles summarise the project at a glance.

Major outcomes from Dashboard 1:

- **Medal leaders:** the United States (735 medals) and China (696) lead by a wide margin, followed by Russia (429), Great Britain (401) and Germany (336).
- **Close gold race:** United States 250 gold and China 230 gold; in medal points the United States has 1,443 and China 1,386.
- **Evenly spread participation:** Surfing has the most athletes (201), then Canoe/Kayak (199) and Handball (193); Luge has the fewest (100).
- **Most active athletes:** Wei Ngozi has the most records (17), followed by Wei Ferreira (15).
- **Project scale:** the dashboard covers 60 countries, 50 sports, 8,000 athletes and 18 Games (1992–2026).
