Story

Date	01-11-2026
Team ID	EN25CS3011097
Project Name	Global Olympic Sports Performance Analysis

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It's a tool for **data storytelling**, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

In Tableau, **Story** is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way. It's like a slideshow within Tableau that guides the audience through a series of data points, helping them understand key insights, trends, or outcomes of your analysis.

Activity 1: Story design

Story 1 – "Global Olympic Sports Performance Analysis" captures Dashboard 1 as its story point.

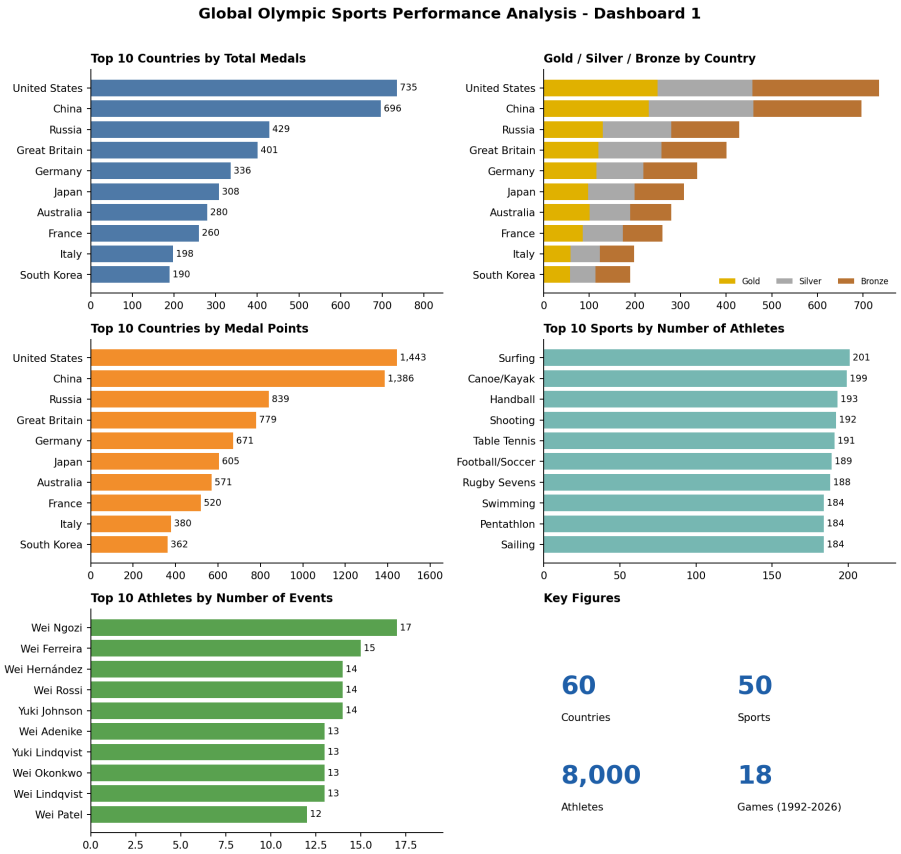

Figure: Story 1 – Global Olympic Sports Performance Analysis (Story Point 1)

Story Point	Caption	Content
1	Global Olympic Sports Performance Analysis	Dashboard 1 with the analytical views

Observations:

- **United States and China lead:** they have 735 and 696 total medals, which is 23.8% of all 6,025 medals in the medal results.
- **Gold race is close:** United States 250 gold and China 230 gold; medal points are 1,443 and 1,386.
- **Large gap to the next group:** Russia 429, Great Britain 401 and Germany 336.
- **Participation is evenly spread:** Surfing 201, Canoe/Kayak 199 and Handball 193 athletes; Luge is lowest at 100.

- **Europe leads by region:** 2,822 of 6,025 medals (46.8%).
- **Gender-balanced athlete records:** 4,179 male (52.2%) and 3,821 female (47.8%).

Activity 2:

Publish Story on Tableau Public and paste the public link below:

Item	Details
Packaged workbook	Global-Olympic-Sports-Performance-Analysis-Story.twbx
Story name	Story 1 – Global Olympic Sports Performance Analysis
Tableau Public link	To be added by the team after publishing
