Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Analyst / Viewer).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Clean and Prepare Data).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., CSV file, Hyper extract).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.
