Project Design Phase-I
Solution Architecture

Date	01-11-2026
Team ID	EN25CS3011097
Project Name	Global Olympic Sports Performance Analysis

Solution Architecture:

Solution architecture is a complex process with many sub-processes that bridges the gap between business problems and technology solutions. Its goals are to find the best tech solution to solve existing business problems, describe the structure, characteristics and behavior of the solution, and define features, development phases and solution requirements.

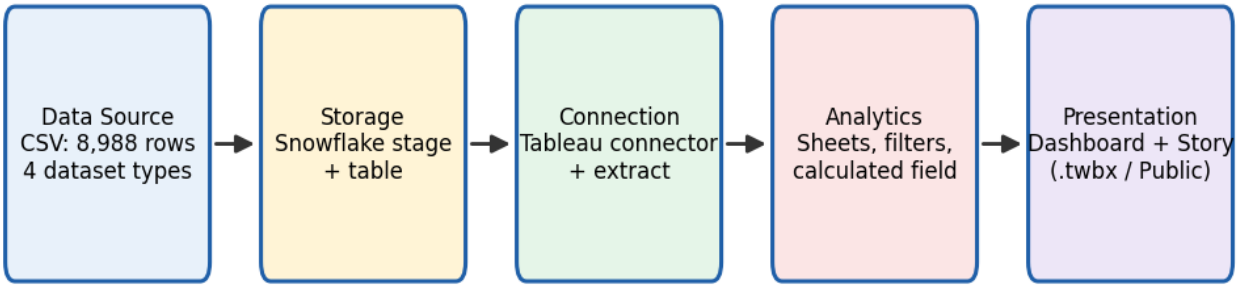

Figure: Solution architecture (data source to dashboard and story)

Layer	Component	Description
Data source	athelete_events.csv	8,988 rows x 56 columns with dataset_type values athletes, medal_results, alltime_country_rankings and games_summary
Storage	Snowflake stage and table	CSV is staged and loaded with COPY INTO into table OLYMPIC_EVENTS
Connection	Tableau connector / extract	Connects to the table or CSV; extract improves performance
Analytics	Worksheets, filters, calculated field	Total Medals Calculated = total_gold + total_silver + total_bronze; COUNTD of athlete_id
Presentation	Dashboard 1 and Story 1	Interactive dashboard and guided story
Delivery	.twbx / Tableau Public / PDF	Packaged workbooks and documentation
