GLOBAL OLYMPIC SPORTS PERFORMANCE ANALYSIS
PHASE 1: Ideation Phase

Project theme: historical Olympic participation and medal performance.

Objective

Generate and prioritize feasible ideas for analyzing global Olympic sports performance.

Project idea

Global Olympic Sports Performance Analysis: use historical Olympic athlete-event records to explore participation, medal outcomes, and changes in sports performance across countries, sports, seasons, and years.

Brainstormed ideas

- Compare medal totals by National Olympic Committee (NOC) and Olympic year.
- Analyze medal distribution by sport and event.
- Compare Summer and Winter Olympic participation and medal patterns.
- Explore participation by sex and age group.
- Identify long-term trends and notable changes across Olympic editions.
- Create clear charts and summary tables for students, educators, sports analysts, and Olympic fans.

Prioritization criteria

- Data availability and completeness.
- Relevance to the project problem and intended users.
- Feasibility with available tools and time.
- Ability to produce verifiable results.
- Clarity of interpretation and visualization.

Selected idea

Build a reproducible analysis workflow with data cleaning, summary tables, visualizations, and documented limitations.

Expected output

A cleaned analysis dataset, medal and participation summaries, visual insights, and project documentation.

Expected phase deliverable

Prioritized project idea and clear scope.
